**Doctoral INPhINIT Fellowships**

*at research centres of excellence of Spain and Portugal*

# Call for *applications*

## 2023

# Phd Position

A high-performance Energy Management System for railway power supplies.

[READ MORE](#)

Artificial intelligence powered robotic synthesis and evaluation of advanced hybrid materials for solar fuel production.

[READ MORE](#)

Closing the loop: turning conventional fossil-derived plastic residues into bio-based plastics and chemicals by an innovative strategy.

[READ MORE](#)

Customised porous ceramics for solar fuels production.

[READ MORE](#)

Development of Solar Redox Flow Batteries.

[READ MORE](#)

Extremophiles as an innovative solution to replace petrochemicals.

[READ MORE](#)

Metal Organic Frameworks: towards microplastics valorization.

[READ MORE](#)

New accelerated testing methodologies and aging models of lithium -ion batteries.

[READ MORE](#)

Novel bismuth-based .perovskites for photovoltaics and photocatalytic applications.

[READ MORE](#)

Regionalised life cycle sustainability assessment of alternative transportation fuels.

[READ MORE](#)
